

HH HEARST | HEALTH
innovation lab

MISSION

To pioneer markets, technologies, products and methods that improve and interconnect a person's health journey.

THE HEARST HEALTH NETWORK

a provider of drug knowledge bases that empower healthcare information systems and enable healthcare professionals to make better medication-related decisions

the market leader in providing evidence-based care plans, order sets and clinical optimization programs, to measurably improve patient outcomes, enhance safety, and lower costs

independent developer and producer of evidence-based clinical guidelines and software used by hospitals and health plans to support care management

the Best in KLAS® provider of comprehensive software-as-a-service solutions to the homecare and hospice market

Hearst Health Network Extensions

a team of clinical and product specialists who rapidly develop healthcare technology, and collaborate with external clinician-entrepreneurs to incubate new products

a newly formed fund investing in startups that offer health IT solutions and technology-enabled healthcare services

PRODUCT INCUBATOR

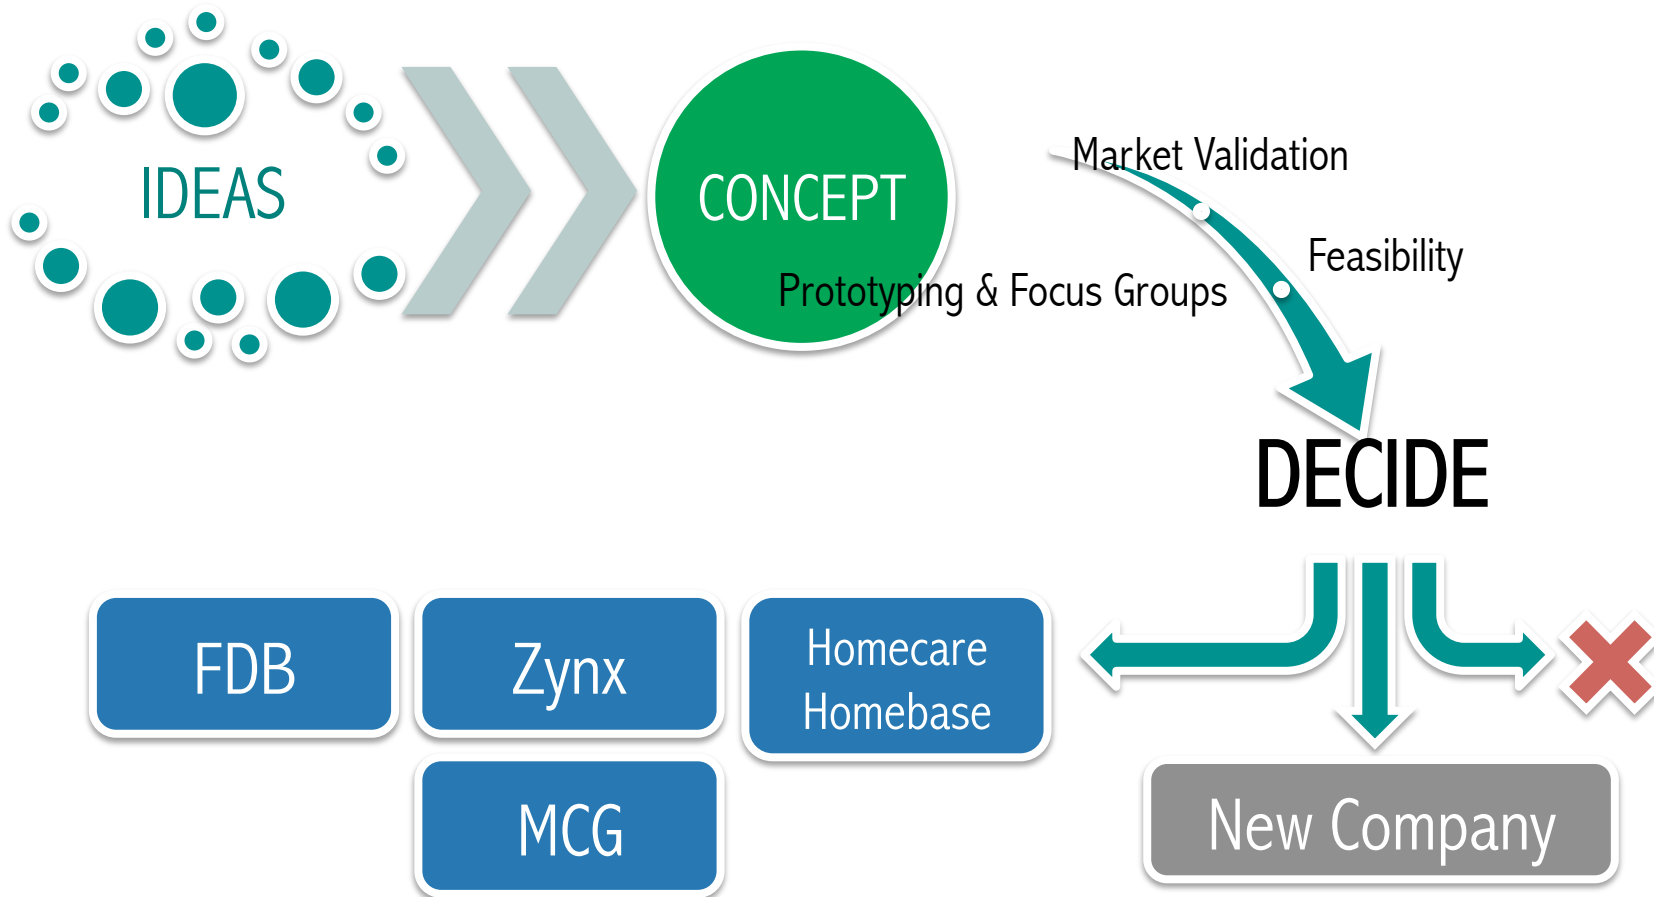

Healthcare needs innovation & productivity growth

- New solutions that save money and improve outcomes
- Tech and/or content-enabled solutions drive labor productivity and efficiency
- Supporting the evolution to value-based care

Hearst Health Innovation Lab offers team of specialists who tackle early-stage opportunities

- Small team moves with the agility of a start-up, but backed by the resources of Hearst Health
- Access to Hearst Health network of companies and clients

INNOVATION PROCESS

INNOVATION TARGET

HORIZON 1

The Lean Startup Validation Cycle

Pivot BEFORE
product/market fit,
optimize AFTER

LEAN Enabled Start-Ups April 13th HIMSS 2015 –
Dean Sawyer, CEO Sentrian

DESIGN THINKING

INSTEAD OF...

- Elaborate planning
- Intuition
- Linear, complicated plans
- Consistent execution
- “Perfect”
- Failure as an exception
- Reorganizing or quitting

TRY ...

- Experimentation
- Customer feedback
- Cyclical, iterative design
- Learning, nimbleness, speed
- Accepting “good enough”
- Failure expected
- Iterating and pivoting

Why the Lean Start-Up Changes Everything
